Small settling movements: check A3 displacement as well as the noisy A2 estimate
C1 50 Hz — supplementary encoder average
Plotted min/max: -0.0319 / 0.1373
Average velocity (rad/s)
Time-averaged transmitted target
A3 displacement / actual interval (~100 ms)
Plotted min/max: -0.0450 / 0.0908
Average error (rad/s)
Encoder-average error
Seconds since core start; averaging is diagnostic, not a shifted raw trace
C1 200 Hz — supplementary encoder average
Plotted min/max: -0.0318 / 0.1611
Average velocity (rad/s)
Time-averaged transmitted target
A3 displacement / actual interval (~100 ms)
Plotted min/max: -0.0450 / 0.1145
Average error (rad/s)
Encoder-average error
Seconds since core start; averaging is diagnostic, not a shifted raw trace
