Repetition comparison | only this figure remaps samples to nominal plan coordinates
Interpolated positions are descriptive; all main tracking/error metrics use original fresh samples
Position (rad)
Run 1: A3 interpolated only at actual target-change times
Identical target plan
Run 2: A3 interpolated only at actual target-change times
Nominal plan time (s); diagnostic binning, not actual wall time
Error (degrees)
Run 1: fresh unshifted error, nominal bin
Run 2: fresh unshifted error, nominal bin
Nominal plan time (s); diagnostic binning, not actual wall time
