
Host timing only: an aborted command is absent from successful-TX lateness samples
These timestamps do not measure motor acquisition time, on-wire TX time or CPU scheduling cause
Steering MIT 50 Hz | completed
min 0.021459 | max 2.9365
Steering MIT 200 Hz | aborted
min 0.02118 | max 4.2128
Rear C0 50 Hz | completed
min 0.016532 | max 3.4666
Rear C0 200 Hz | completed
min 0.012405 | max 4.0202
Host timing (ms)
Time from replay start (s)
Kernel-RX to host-processing age
Successful command send lateness
Command abort threshold 3 ms
Timing abort ~5.373 s
