Independent A2/A3 consistency check: identical actual endpoints, 24 steady trials
A3 angle travel / same interval [rad/s]
A2 time-average speed [rad/s]
Repeat 1
Repeat 2
Repeat 3
Equal measurements
A3-derived speed / A2 speed − 1 [%]
A2 time-average speed [rad/s]
Repeat 1
Repeat 2
Repeat 3
Fitted difference 1.580%
No time shift or physical calibration applied. Both directions and all three repeats show the discrepancy.
