Rear MIT PI: P=0.30, I=3.3, 200-Hz motion; final 100 ms
Application backlog rises before SocketCAN ENOBUFS
Outstanding requests
Requests without a logged reply
Estimated send failure
FIFO reply delay [ms]
A1
A2
F1
Estimated send failure
Host time relative to estimated failure [ms]
Logged requests are not measured kernel TX-queue occupancy. FIFO host pairing is not motor-loop latency. Failed sends are absent from the CSV.
