No DR · training-matched · env 16
Full DR · robustness test · env 0
Scaled raw policy output
Held steering target entering PD
Actual simulated steering position
Steering position (deg)
Evaluation time (s)
Motor torque submitted to PhysX
Solver-measured joint-axis effort
Rear torque (N m)
50 Hz policy / 400 Hz physics · 0–0.6 s · resets break lines · no smoothing/time shift; linear axes
