MIT steering · 5 Hz / ±1 rad / Kp 10, Kd 0.2 · Full recording

1 MIT encoded position target

Position (rad)

2 A3 position feedback

Position (rad)

3 A2 velocity feedback

Velocity (rad/s)

4 A1 current-derived torque

Torque (Nm)

Recorder elapsed time (s); no phase shift

Positive = logged joint direction (right); A3/F1 independent startup zeros. Red = feedback gap >50 ms.
Torque is current-derived; final CF disabled-mode confirmation failed. Motion feedback only; no invented shutdown hold.
