
October 29 deployment · model_2500 · all 21 attempts concatenated
Red lines and numbers mark attempt starts; curves are not joined across attempt boundaries
Recorded target/response range: -1.581 to 1.563 rad
Steering position (rad)
MIT position target after 50 Hz slew
A3 steering position
Recorded target/response range: -6.595 to 6.320 Nm
Rear drive torque (Nm)
Encoded C0 torque target
A1 current × Kt torque estimate
Cumulative active recording time (s) — pauses removed; timing within each attempt unchanged
