Three stale-feedback interruptions | clock guards, packet freshness and acknowledgements are separate
Rows retain source telemetry; a flag change does not prove the exact physical torque-off instant

Attempt 13: motor_fault

Attempt 14: motor_fault

Attempt 21: motor_state_timeout

Encoder pair age (ms)

steering_pair_age_ms
drive_pair_age_ms
50 ms I/O freshness gate

Motor publication age (ms)

Policy age of motor_state publication
60 ms policy freshness gate

Flag

outputs_active
fault_latched
disable_confirmed

Seconds relative to motor fault event
